Gee, where to begin.....:)

"Is" is singular. "there" are two bacteria listed. One could argue (stubbornly, perhaps) that the slash suggest a combination, so a singular approach isn't necessarily wrong. But I don't really care whatever. No ownership here.

. Bacteria/Fecal Bacteria is also not a general criterion for re-sampling.

Criterion is singular and there are two bacteria listed so criteria is correct. However, I did offer some suggestions to Rich so maybe he will accept some of them.

Jerry,

Here's my cut at the document. I got it onto one page, which I think is necessary. It also includes a chart, summarizing criteria and homes, as requested. I am sure that the accompanying description may get cut, but I thought I'd get it to you, since Dana is looking for this by COB today.

Rich
